And, the best practices don't stop at the visual elements...copy voice, subject lines, call-to-actions, and pre-headers all work with the visual elements to create a cohesive design that drives results. In this session we'll dissect the latest trends, discuss measuring ROI along with best practices to reveal tips that will truly make your email campaigns a success.

- **9:30 – 10:30 Social Influencers: Holy Grail or Fool's Gold?:** Social influencers are often self-proclaimed and not always legit, so it's essential to evaluate each opportunity, set parameters, establish goals, and (most important) take risks. But first...you must decide if working with social influencers is the right marketing match for your brand. In this session, you'll get all the facts necessary to cultivate your own informed point of view, and you'll come away with clear evaluation tools to approach the process with more confidence.

In this session we'll show you a practical, step-by-step method for auditing your website, social media channels, email marketing, and more.
